guarantee*

The **CIMA Operational Case Study** exam is often the first time students have had to create long form responses to case related questions, and this can prove daunting. In response, HTFT has created a robust Operational Case Study course that comprises downloadable case debriefs, **11** live online sessions, **3** online mock exams, **3** section tests and **6** homework tests – **all for £999**.

What you get with our Operational Case Study product:

Before the pre-seen is released

- We invite you to our Online Learning Community and to our Operational level assumed knowledge group on our Online Learning Community so you can go through all of our **P1, F1** and **E1** content to brush up your knowledge
- We provide notes and recordings to support the transition from OT papers to the Case Study
- We send out to you the CIMA approved Case Study text book

When the pre-seen is released

- We upload, into our OCS group, **3 debriefs** of the **CIMA pre-seen** – one from a P1 perspective, one from an F1 perspective and one from an E1 perspective
- We upload **3 sets of notes** – your Case applied to the E1, F1 and P1 syllabuses

Course delivery

- We deliver the course as a series of **11 weekend morning/weekday evening live online sessions** – that are recorded and then uploaded to the OCS group (for you to re-watch). The sessions focus on one pillar, i.e. F1, P1 or E1 and are delivered by specialist tutors
- We set **3 section tests** and **6 core homework's** that we ask to be handed in for marking by your tutors, so you get ongoing feedback
- We set **3 online Mock exams** that replicate the real CIMA Case Study exam – these are marked by us and sent back to you with comprehensive feedback

Support

- You get the contact details of our OCS tutor team, who will support you right up to your Case Study exam date

*To be entitled to the cash back offer, you have to attend all 11 live online sessions, hand in all section tests and homework's and attempt all online Mocks exams by the deadline dates. All submitted pieces of work (including mocks) must be marked as 'strong' or they will have to be redone by the student until the tutor considers the answer is 'strong'.
