

HTFT play

Catch up on your studies, stream topic recordings and test your Proficiency

Frequently Asked Questions

What is HTFT play?

HTFT play is our latest innovation for CIMA studiers.

HTFT play has been built so that individuals can get instant access to high quality content and resources. HTFT play is focused at helping individuals catch up on their studies through streaming topic recordings and test their exam readiness with our computer-based **Proficiency** practice assessments.

We wanted HTFT play to offer all of the resources on one platform – removing the need to navigate to different portals.

What is included in the Boxsets?

The Boxsets (for the CIMA OT exams) provide individuals with the following:

- A downloadable set of our HTFT student notes
- A downloadable 'Work Schedule' setting out how to work through the Boxset
- A series of bite-sized videos covering all of the topics on the specific syllabus
- Downloadable annotated notes for each set of topic videos

Each Boxset contains numerous videos per topic area. For example, in our CIMA F2 Boxset, '*Topic 7 - Revenue from contracts with customers*' comprises 13 videos, covering the syllabus content and including exam-style questions.

What are Proficiency 1 and Proficiency 2?

We are excited by our **Proficiency 1** and **Proficiency 2** exam-style practice assessments.

Proficiency 1 and **Proficiency 2** are both purposed built exam-style practice assessment to help you test your exam readiness.

They are both timed exam-style (60 objective test questions in 90 minutes) practice assessments with instant grading, in-built model answers and rationale, along with question by question debrief of the solutions.

The question by question debriefs will really help individuals drill down and analyse their results – showing them which areas of the syllabus they need to work on.

How do I buy the HTFT play products?

We have built a e-shop where you can search through all of our HTFT play products.

Here is a link to the HTFT play e-shop: <https://htft.rogoserver.com/shop>

What is the difference between Proficiency 1 and Proficiency 2?

Apart from the name and the questions they contain, nothing.

They are two different variants, in the same way CIMA have different exam variants. They are both exam-style practice assessments containing 60 questions.

What is the difference between the Diagnostic Mock and Proficiency 1 and 2?

Our Diagnostic Mocks and Proficiency 1 and 2 all contain 60 exam-style questions with instant marking, answers, rationale and question by question debriefs.

The main difference is that the **Diagnostic Mock** is **split proportionally into the relevant CIMA syllabus Sections** – allowing you to analyse and diagnose your Section by Section performance.

How long do I get access to the content for?

You get access to the **Boxset** for **6 months**

You get access to **Proficiency 1** and **Proficiency 2** for **2 months**

You get access to our Case Study Exam Kits and Section Test Packs for **1 month**

You get access to our Case Study Mock exams for **1 month**

What is the difference between HTFT play and your previous Instant package?

For CIMA Objective Test exams, HTFT play replaces our Instant package.

There are a couple of differences:

- The HTFT play resources are all on one platform – so only one log in required
- We have split the resources into **Boxsets** (topic recordings with HTFT notes) and **Proficiency 1** and **Proficiency 2** (exam-style practice assessments [mocks]) – giving you more flexibility about what you buy and when
- Combined, the **Boxset** and **Proficiency 1** and **Proficiency 2** offer better value than our previous Instant package (a saving of £64)
- HTFT play removes the need for enrolment forms, and you get instant access to the content
- You can split how you purchase it. We recommend the **Boxset** first and then, when you are ready, the 2 **Proficiency** exam-style practice assessments
- It gives you greater flexibility

What is the difference between HTFT play and the HTFT on-demand package?

We have de-bundled elements of our on-demand package to create HTFT play.

The syllabus topic recordings have used to create our **Boxsets** and our **Proficiency 1** and **Proficiency 2** (exam-style practice assessments) have been made available individually.

The main differences between HTFT play and our on-demand package are:

- The HTFT play resources are all on one platform – so only one log in required
- HTFT play removes the need for enrolment forms, and you get instant access to the content

- The recordings of our Masterclasses are part of the on-demand package, along with:
 - our Checkpoint Tests and Midpoint exam-style practice assessments
 - the CIMA approved Study Text, Exam Kit and Pocket Notes
- Cost – our HTFT play products are priced differently to on-demand, and give you greater flexibility in what you purchase

Do I get access to a tutor for technical queries?

You are provided with an email address for issues with the platform. However, you are not provided with tutor details for technical queries.

We feel that the way the products have been developed, removes the needs for technical queries. We will, however, be constantly reviewing this.

When are the HTFT CIMA Exam Kits and Section Test Packs available for sale?

Our Exam Kits and Section Test Packs are made available on our [e-shop](#) 2 weeks before the CIMA case study exam window.

What is the difference between your Case Study Exam Kit and your Case Study Section Test Pack?

Your real CIMA Case Study exam is split into Sections: 4 Sections for OCS and MCS, and 3 Sections for SCS.

In each Section you will be presented with a 'Trigger' and a couple of 'Sub-tasks' (typically 2 or 3 per Section).

- Our Case Study Exam Kit is, on average, over 50 'Sub-tasks' with suggested solutions.
- Our Case Study Section Test Pack is 6 full exam-style 'Sections'.
- Our Case Study Exam Kit allows us to cover more syllabus content, and our Section Test Pack allows us to create Sections, each with a couple of 'Sub-tasks' – mirroring the exam style.

Do I get marking with your Case Study Mocks?

You get access to the HTFT suggested solutions so you can mark your own Mock, before you attempt it again.
